

Energy and Data Management for the Construction Industry

**Your Partner for Electrification
of Mobile Construction Equipment**

About us

Conductix-Wampfler is a worldwide global leader in energy and data transmission solutions for mobile industrial equipment. We offer a complete range of customized products from a single source that keep systems operational 24/7, 365 days a year.

Electrification and Sustainability ▶

We support OEMs on their decarbonisation journey as reliable partner with a global production and sales network.

Our ZeroEmission solutions work worldwide since many years under toughest conditions.

Innovative Product Solutions ▶

We offer a comprehensive product portfolio tailored for off-road mobile machinery in the construction sector.

With decades of expertise, we provide industry-leading solutions for mobile equipment electrification.

Global Expertise and Partnership ▶

As a technology expert in energy and data transmission, we are now placing a stronger focus on mobile construction equipment.

With the largest reference and installation base worldwide, we are a leader in mobile electrification.

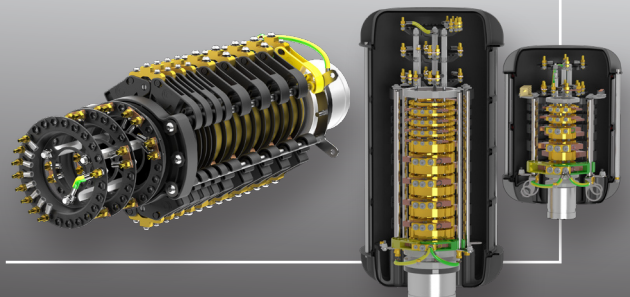

Radio Remote Controls

- IP 65
- Li-ion battery
- 1, 2 or 3 joysticks

Slip Ring Assemblies

- Reliable and with high performance
- High modularity and flexibility
- Data Transmission up to 1Gbps

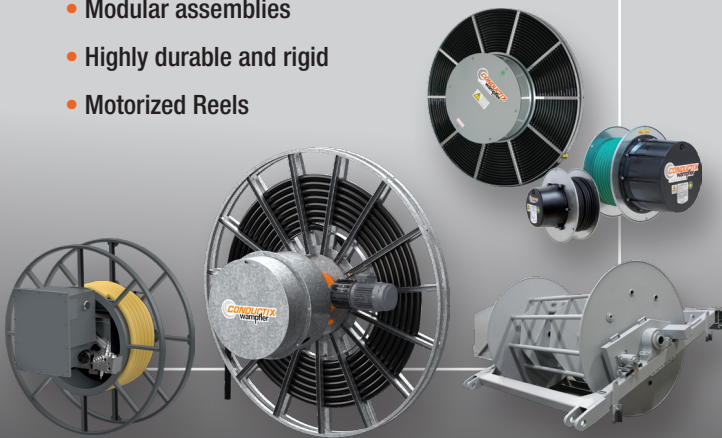

ECO BatteryPack

Reeling Systems

- Optimal corrosion protection
- Modular assemblies
- Highly durable and rigid
- Motorized Reels

Batteries

- System Voltage [V] ~ 300 – 1000 max.
16-320kWh capacity
- LFP batteries (LiFePO4)
- Modular design incl. BMS
